

SENIOR LEADERSHIP PROGRAMME

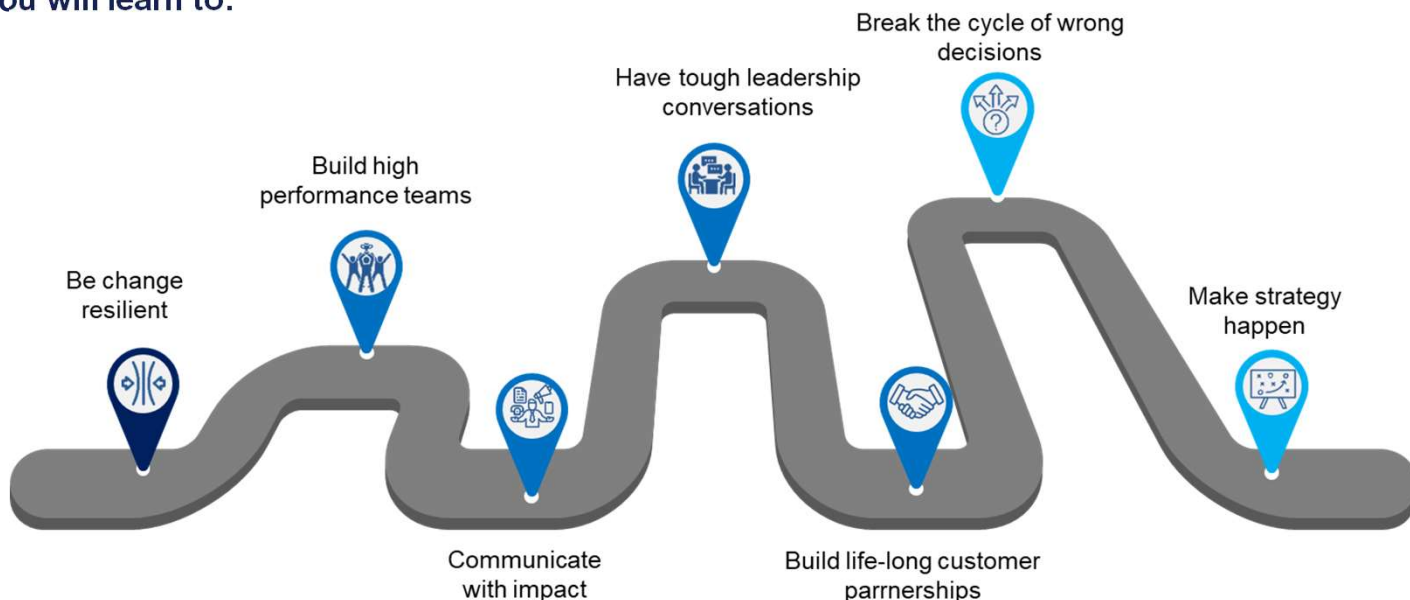

The aim of this programme is to equip senior- and executive leadership with a set of tools that will enable them to take their organisation to the next level.

Our philosophy of leadership is based on the notion of **leading self, leading others and leading business**. It implies that quality leadership starts with insight into your own behaviours, feelings and impact on others. This influences your ability to manage and renew yourself on an emotional, physical, spiritual and social level. Only then will a leader be able to lead others, build effective teams and inspire others to become champions. This leads to superior and sustainable business results based on collaboration and creativity.

The foundation of the “Leadership Journey” is based on real life experiences and practical application (lots of toolkits, sharing of experience, personal commitments and classroom practice).

You will learn to:

Build your own:

In addition to the recommended programme, you can add or substitute the following modules to craft your own unique offering

-  Appoint the missing link
-  Leading others
